

## *Quick Card*

# CYBERSECURITY BREACH CHECKLIST

## *What to do When Breached*

- Determine the source and method of compromise.
- Stop additional data loss or risk to operations—shut down the attacker’s access.
- Use independent cybersecurity and forensic experts to ensure attacker’s removal from your systems.
- Establish a secure communication (internal and external) channels.
- Determine communication plans for employees, vendors and customers.  
Determine your operational, legal, contractual and insurance notification obligations.
  - Operational \_\_\_\_\_
  - Legal \_\_\_\_\_
  - Contractual \_\_\_\_\_
  - Insurance \_\_\_\_\_
